Monitoring, Evaluation, and Learning
USAID/BFS
Gather Empirical Evidence through M&E

Provide Accountability

Learning for Improved Effectiveness
High Level Objective: Inclusive agriculture sector growth

- Agriculture Sector GDP
- Per capita expenditures in rural households
- Women’s Empowerment in Agriculture Index

Improved agriculture productivity

- Gross margins per unit of land or animal of selected product

Expanding markets and trade

- Percent change in value of intra-regional exports of targeted commodities
- Value of incremental sales (farm-level)

Increased private investment in agriculture and nutrition activities

- Value of new private investment in ag sector or value chain
- % pub. expenditure on ag. and nutrition
- # of local firms/CSO operating sustainably

Improved nutrition-related behaviors

- Prevalence of anemia
- Number of children under five reached

Increased employment opportunities in targeted value chains

- Jobs created by investment in agricultural value chains

Improved access to diverse and quality foods

- Dietary diversity for women and children

Increased resilience of vulnerable communities and households

- Household Hunger Scale

Improved nutrition-related behaviors

- Exclusive breastfeeding under six months

High Level Objective: Improved nutritional status esp. of women & children

- Prevalence of stunted children
- Prevalence of wasted children
- Prevalence of underweight women

Feed the Future Goal: Sustainably Reduce Global Poverty and Hunger

Programs and policies to support agriculture sector growth

Programs and policies to increase access to markets and facilitate trade

Programs and policies to reduce inequities

Programs and policies to support positive gains in nutrition

Current Results Framework 2010 to 2017

- Prevalence of poverty
- Prevalence of underweight children

- Prevalence of stunted children
- Prevalence of wasted children
- Prevalence of underweight women

- Dietary diversity for women and children
- Exclusive breastfeeding under six months
- Number of children under five reached

- Gross margins per unit of land or animal of selected product
- Percent change in value of intra-regional exports of targeted commodities
- Value of incremental sales (farm-level)
- Value of new private investment in ag sector or value chain
- % pub. expenditure on ag. and nutrition
- # of local firms/CSO operating sustainably
- Jobs created by investment in agricultural value chains
- Household Hunger Scale
- Dietary diversity for women and children
- Exclusive breastfeeding under six months
- Number of children under five reached

- Prevalence of poverty
- Prevalence of underweight children

- Prevalence of stunted children
- Prevalence of wasted children
- Prevalence of underweight women

- Dietary diversity for women and children
- Exclusive breastfeeding under six months
- Number of children under five reached
High Level Objective:
- Improved nutritional status esp. of women & children
- Increased resilience of vulnerable communities and households
- Increased employment opportunities in targeted value chains
- Programs and policies to reduce inequities

Improved agriculture productivity
- Gross margins per unit of land or animal of selected product
- Expanding markets and trade
- Percent change in value of intra-regional exports of targeted commodities
- Value of incremental sales (farm-level)

Increased private investment in agriculture and nutrition activities
- Value of new private investment in ag sector or value chain
- % of post-expenditure on ag. and nutrition
- # of local firms/CSO operating sustainably

Increased employment opportunities in targeted value chains
- Jobs created by investment in agricultural value chains

Increased resilience of vulnerable communities and households
- Household Hunger Scale

Improved access to diverse and quality foods
- Dietary diversity for women and children

Improved nutrition-related behaviors
- Exclusive breastfeeding under six months

Improved use of maternal and child health and nutrition services
- Prevalence of anemia
- Number of children under five reached

The U.S. Government is contributing to progress, and new data* show:

- **Ethiopia**
  - Poverty: 12% from 2013 to 2015

- **Bangladesh**
  - Childhood Stunting: 12% from 2011 to 2014

- **Rwanda**
  - Childhood Stunting: 14% from 2010 to 2015

- **Cambodia**
  - Childhood Stunting: 23% from 2011 to 2014

- **Malawi**
  - Poverty: 18% from 2010 to 2015

- **Ghana**
  - Poverty: 12% from 2012 to 2015

* Lines that are bolded and in color indicate statistically significant change.
**Goal:** Sustainably reduce global hunger, malnutrition, and poverty

**Objective 1**
Inclusive and sustainable agricultural-led economic growth

- IR 1: Strengthened inclusive agriculture systems that are productive and profitable
- IR 2: Strengthened and expanded access to markets and trade
- IR 3: Increased employment and entrepreneurship
- IR 4: Increased sustainable productivity, particularly through climate-smart approaches

**Objective 2**
Strengthened resilience among people and systems

- IR 5: Improved proactive risk reduction, mitigation, and management
- IR 6: Improved adaptation to and recovery from shocks and stresses

**Objective 3**
A well-nourished population, especially among women and children

- IR 7: Increased consumption of nutritious and safe diets
- IR 8: Increased use of direct nutrition interventions and services
- IR 9: More hygienic household and community environments

**Cross-Cutting Intermediate Results (IR)**

- CC IR 1: Strengthened global commitment to investing in food security
- CC IR 2: Improved climate risk, land, marine, and other natural resource management
- CC IR 3: Increased gender equality and female empowerment
- CC IR 4: Increased youth empowerment and livelihoods
- CC IR 5: More effective governance, policy, and institutions
- CC IR 6: Improved human, organizational, and system performance
Harmonization and Collaboration

Opportunities to Advance
Thank you.
