Using Measures for Leveraging Program Change and Transformation

Jeremy Zelkowski, University of Alabama, jzelkowski@ua.edu

CBMS MET2, NCTM SPA, AMTE, and MTE-Partnership span many recommendations for ideal or minimum expectations of program components for secondary mathematics teacher preparation. This session will focus on using specific measures as a means to leverage change that can or should ultimately impact teacher candidate development and performance to achieve well-prepared graduates. Multiple measures and prior experiences are shared and discussed.

Watch the presentation: https://youtu.be/832Ihr2mjV0

Discussion questions:
• What are your top three transformational changes you see as needed for your secondary math preparation program(s)?
• What roadblock(s) exists to instituting these transformational change(s)?
• What measures may or would allow for instituting such transformational change(s)?
