## Welcome to the Core Data Metrics (CDM) Portal – in support of APLU's Powered by Publics

The institutional data submitted supports the PxP goal to measure progress towards cluster equity and completion goals, to identify areas of focus that support student success for low-income and minority students, and to support transparency and our community of learning. As change-ready universities we acknowledge that we can bolster public trust in higher education through transparency. No student level data is collected. All institutional data are stored behind firewalls with access limited to APLU staff and contractors.
