

FY2019 Appropriations Priorities DEFENSE

ABOUT THE ASSOCIATION OF PUBLIC AND LAND-GRANT UNIVERSITIES

APLU is a research, policy, and advocacy organization dedicated to strengthening and advancing the work of public universities.

With a membership of 237 public research universities, land-grant institutions, state university systems, and affiliated organizations, APLU's agenda is built on the three pillars of increasing degree completion and academic success, advancing scientific research, and expanding engagement.

Annually, its 196 U.S. member campuses enroll 4 million undergraduates and 1.2 million graduate students, award 1.1 million degrees, employ 1.1 million faculty and staff, and conduct \$40.8 billion in university-based research.

APLU 1307 New York Avenue NW Suite 400 Washington, DC 20005 p: 202.478.6040 www.aplu.org

DEPARTMENT OF DEFENSE (DoD)

SCIENCE AND TECHNOLOGY (6.1 - 6.3) APLU FY2019 Request: \$14.617 billion

(FY2019 PBR = \$13.661B; FY2018 = TBD; FY2017 = \$14.011B)

It is critical for U.S. national security that our military stay on the leading edge of technology and scientific capabilities. To do so, APLU recommends funding of \$14.617 billion in FY2019 for the DoD Science and Technology (S&T) account, a four percent increase over the level included in the Senate-passed FY2018 Defense Appropriations bill. Defense S&T is essential to our national security and global military superiority. The S&T program supports research that leads to the development of new weapon systems, defense capabilities and war fare technologies. We must maintain a strong investment in our defense science and research efforts if we intend to stay ahead in our defense capabilities, prevent an innovation deficit, and build a better America.

BASIC RESEARCH (6.1)

APLU FY2019 Request: \$2.371 billion

(FY2019 PBR = \$2.269B; FY2018 = TBD; FY2017 = \$2.276B)

Within the S&T account, APLU urges robust funding of defense basic research (6.1). Discoveries from defense basic research have led to paradigm shifts in military capabilities that are supporting the men and women in the military today. In addition to advocating for strong funding for all defense basic research efforts, APLU encourages funding each of the following basic research program elements at these designated levels:

Dollars in thousands

Program Element	FY17 Enacted	FY18 Enacted	FY19 PBR	FY 19 Request
Army RDT&E Defense Research Sciences	\$293,116	TBD	\$276,912	\$304,841
Army RDT&E University Research Initiatives	\$69,166	TBD	\$65,283	\$71,933
Army RDT&E University and Industry	\$112,280	TBD	\$92,115	\$116,771
Research Centers				
Navy RDT&E University Research Initiatives	\$121,714	TBD	\$119,433	\$139,495
Navy RDT&E Defense Research Sciences	\$422,748	TBD	\$458,708	\$477,056
Air Force RDT&E Defense Research Sciences	\$380,812	TBD	\$348,322	\$396,044
Air Force RDT&E University Research Initiatives	\$150,044	TBD	\$154,991	\$161,191
Air Force RDT&E Higher Energy Laser Research	\$14,168	TBD	\$14,506	\$15,086
Initiatives				
Defense-Wide	\$35,436	TBD	\$37,023	\$38,689
RDT&E DTRA Basic Research Initiatives				
Defense-Wide	\$68,154	TBD	\$42,702	\$70,880
RDT&E Basic Research Initiatives				
Defense-Wide	\$79,345	TBD	\$85,919	\$107,430
RDT&E National Defense Education Program				

APLU FY2019 DEFENSE APPROPRIATIONS PRIORITIES (con't)

APLU also encourages support of the applied program elements delineated below.

The Defense-Wide Manufacturing Science and Technology Program supports the Manufacturing USA network. The goal of the DoD investments in the Manufacturing USA network is to support regional hubs to accelerate technological innovation into commercial application and concurrently develop the educational competencies and production processes via shared public-private sectors. Manufacturing leadership is essential to sustaining the U.S. military's technical superiority and global dominance.

In addition, to maintain a strong military, we must have healthy families and soldiers. It is imperative for DoD to contribute to curing diseases that affect not only men and women in the military, but also the public since we have an all-volunteer force. The Undistributed Medical Research/Peer-Reviewed programs play a vital role in ensuring that the U.S. has the medical technologies necessary to enable military readiness and serve those who have been wounded on the battlefield.

Dollars in thousands

Program Element	FY17 Enacted	FY18 Enacted	FY19 PBR	FY19 Request
Defense-Wide Manufacturing Science and Technology Program	\$158,398	TBD	\$114,637	\$191,000
Undistributed Medical Research/Peer-Reviewed/Congressionally	\$1,279,200	TBD	n/a	\$1,330,368
Directed Medical Research Programs (CDMRPs)				

DEFENSE ADVANCED RESEARCH PROJECTS AGENCY (DARPA)

APLU FY2019 Request: \$3.439 billion

(FY2019 PBR = \$3.439B; FY2018 = TBD; FY2017 =\$2.889B)

Over the years, DARPA has played an important role in funding high-risk, high-reward research which has led to many significant defense technologies, some of which have also evolved into remarkable civilian applications (e.g., the Internet, GPS). Given the strong FY2019 PBR level for DARPA, the Department of Defense and the administration also recognize the agency is an excellent investment. As Congress seeks to optimally allocate resources, cutting-edge national security research should remain a priority. APLU urges Congress to fund this game-changing research agency at the administration request level of \$3.439 billion in FY2019.
